INVENT NEW MILK TANK TRUCKS, CANDY-PACKAGING MACHINES

DEVELOPS NEW MILK PROCESSING, TRANSPORTING EQUIPMENT -- Leningradskaya Pravda, 8 Dec 50

In November the Leningrad Machine-Building Plant of the Minister of the Meat and Dairy Industry produced and shipped 30 new milk tank trucks to various cities throughout the Soviet Union. The same number will be put out in December. These trucks have a large, yellowish-white tank mounted on the chassis.

Besides the tank trucks, the enterprise has put out stationary tanks of an improved design for storing milk. They are of 2,000, 6,000 and 10,000 liters' capacity.

With the introduction of new technological methods in the enterprises of the milk industry, this plant is receiving a large number of orders for the production of new equipment. Instead of huge, wooden vats, it is now making special aluminum vessels, which greatly speed up the reprocessing of milk. It is also putting out improved refrigerators and other equipment.

INVENTS CANDY WRAPPING MACHINE -- Moscow, Izvestiya, 23 Dec 50

In many of our candy factories, caramels and candies are still wrapped by hand in "little tails." At the Tallin Karamel' Factory, 29 men are engaged in hand-packaging. This year, more than 350,000 rubles has already been spent on hand-wrapping.

An original packaging machine has been designed for caramels and candies. It is simple in working principle, and has few parts. It was made and tried out at our factory early in August. At the summons of Glavkonditer /Main Administration of Confections/ of the Ministry of the Food Industry USSR, the machine was sent to Moscow, where on 19 August it was tested at the Krasnyy Oktyabr' Factory, and approved by a certifying commission.

50X1-HUM

The inventor Boroshtev was given the author's certificate. However, many months have already passed, and Glavkonditer has still not issued an order for making the packaging machine.

The Ministry of the Food Industry USSR should speed up production of the new machine. It will assist in replacing the hand labor of many thousands of workers, and will be a means of great savings to the state. -- Khil'da Kheyn, Director of the Karamel' Factory and Deputy of the Supreme Soviet of the Estonian SSR

REFRIGERATOR SHIP BRINGS MEAT TO FAR NORTH -- Alma Ata, Kazakhstanskaya Pravda, 8 Sep 50

The refrigerator ship Sovetskaya Sibir' has arrived at the mouth of the Yenisey by the Northern Sea Route. It was built by one of the ship-repair plants of the Ministry of the River Fleet USSR in 1950. The ship brought 1,000 tons of fresh meat to the polar regions.

The Sovetskaya Sibir' will sail from Ust'-Port to Krasnoyarsk and back, supplying workers in the central part of Krasnoyarskiy Kray with fresh fish, and those in the Arctic regions with meat and dairy products from the kray food industry.

SUPPLIES MOSCOW WITH GAS APPLIANCES -- Moscow, Vechernyaya Moskva, 8 Dec 50

Apparatus produced by the Moscow Gazoapparat Plant is widely used for the Moscow Gas Industry. The plant is constantly improving production and putting out new types of items. It has developed the production of household gas refrigerators, which have distinct advantages over electric ones.

The plant is now working on the development of a new type of gas fireplace.

SOCIALISTIC MAINTENANCE OF EQUIPMENT SPREADS -- Moscow, Moskovskaya Pravda, 22 Dec 50

The initiation of socialistic maintenance methods in the care of equipment is spreading to all the shops in the Moscow Gazoapparat Plant. It has been responsible for great savings in resources and a considerable rise in labor productivity.
